

Ultrasound Upgrade Fund Drive

Life Resources of Northern Michigan, Big Rapids

New 4D ultrasound machines with flesh tone technology have given the mother and father of an unborn child a chance to “meet” their child for the first time. These photos are far superior to the previous black and white 2D where an outline of the child is viewed. Now what they will see is *their child*, features, skin tone and all.

Please help us raise the funds necessary to purchase a new machine. You can mail your contribution (“Ultrasound” in memo line) to:

Mecosta/Osceola Right to Life, Inc.
PO Box 231
Big Rapids, MI 49307

Or contribute online at:

rtlmecostaosceola.org
